Projects

Software Development Project in collaboration with PHZ Full-Stack

Helsinki
March 2022 - May 2022

In this project our team collaborates with PHZ Full-Stack in order to create a NPS (Net Promoter Score) application. Such application enables users to use the dashboard for creating their own surveys which could be further integrated into any web-platform. An app is created using React.js, Material UI. Tasks are communicated through Trello, while code is shared and maintained via GitHub.
